16 TRIBAIR, INC., ERIC REIHER and
17 DOES 1-5,

18 Defendants.

19 AND RELATED COUNTERCLAIM.
20

Case No. CV 12 2406

**DECLARATION OF ERIC REIHER IN
OPPOSITION TO MOTION FOR
PRELIMINARY INJUNCTION**

Date: November 15, 2012
Time: 1:30 p.m.
Ct rm: 5, 17th Floor
Judge: Hon. Edward M. Chen

1 I, Eric Reiher, hereby state and declare as follows:

2 1. I am the Chief Executive Officer of the company Tribair, Inc. (hereafter "Tribair"),
3 a defendant in this action.

4 2. I have a Master Degree in Computer Science from the University of Montreal.
5 Prior to Tribair, I was Chief Technology Officer of Mobivox and Chief Operating Officer of
6 Sabse Canada.

7 3. Tribair selected the name WiCall because it was a simple name that described
8 what the application does: Wi-Fi calls. A Wi-Fi call is a term for a call placed on certain types of
9 wireless local area networks ("WLAN"). The name was selected to clearly and concisely
10 communicate to customers the nature of the product they were downloading. We never
11 considered that anyone would confuse WiCall with iCall, and certainly never intended that
12 consumers would confuse the two applications.

13 4. Tribair launched a product called "WiCall: VoIP call, wifi call" (hereafter
14 "WiCall") available on Google's Android Market in August, 2012. A corresponding product,
15 WiCall: Cheap VoIP Phone Call became available on Apple's iTunes in January 2012.

16 5. WiCall has a software component that is free to download and allows Voice over
17 Internet Protocol (VoIP) services. When a customer downloads WiCall onto his or her mobile
18 device, WiCall uses the device's microphone, speakers and Internet connection to let the customer
19 dial traditional telephone numbers without using traditional telephone technology which
20 accumulate long-distance charges from the telephone service provider.

21 6. WiCall does not offer text messages or video connections, which are currently
22 offered by iCall. iCall's features use the phone's keyboard and camera for these additional
23 features.

24 7. A customer must use credits in order to enable the calling features of WiCall.
25 Credits are purchased through the application which is linked to Apple's iTunes App Store or
26 Google's Android Market, which in turn bills the customer's credit card.

27 8. WiCall advertises itself as a cheap VoIP calling service. New customers are given
28 a nominal amount in free credits (less than \$1) so they may try the service at no cost. Once these

DECLARATION OF ERIC REIHER

CASE NO. CV 12-2406

1 credits have been depleted, a customer must purchase credits to continue to make calls. Most of
2 WiCall's competitors in the VoIP application market offer free credits and then require payment
3 after the credits are depleted. In contrast, iCall advertises "Free Calls + Text" on the Google
4 Android Market and in other places. A true and correct copy of the advertisement is attached
5 hereto as **Exhibit A**.

6 9. There are over 1000 VoIP applications available, with Skype being by far the most
7 downloaded. Skype, along with 10 to 20 other applications, is the leading competitor for Tribair's
8 applications. Competitors include KakaoTalk, Skype, Talkatone, Viber, WeChat, Nimbuzz,
9 Fring, and Google Voice, to name a few.

10 10. WiCall currently has a lot of momentum with its download and usage. In Angola,
11 WiCall was the most downloaded application, even compared to other applications such as Angry
12 Birds, Skype and Facebook. In 9 countries, WiCall has been in the top 10 most downloaded
13 applications. In 20 countries, WiCall has been the most downloaded in the category of
14 "Productive applications."

15 11. All of this is done without advertising. WiCall does not have a website, and
16 Tribair does not pay for advertising on Apple's iTunes App Store or Google's Android Market.
17 The only time a user will find WiCall in those databases is through the search function which
18 populates results based on a formula controlled by Apple or Google. On the Android Market,
19 WiCall relies on searches for keywords in its full title "WiCall: VoIP call, wifi call" and to a
20 lesser extent, keywords in its description. A true and correct copy of this reproduced title taken
21 from Google's Android Market is attached hereto as **Exhibit B**.

22 12. A representative of the iTunes App Store called me regarding a complaint
23 submitted by iCall alleging infringement and threatening legal action. When I explained the
24 source of the name WiCall and our commitment to the application, the App Store refused iCall's
25 request to remove WiCall from its listings.

26 13. I recently visited the USPTO website. I found a number of live trademarks that
27 also incorporate the sequence of letters ICALL into their marks. A true and correct copy of this
28 list of marks listed on the USPTO's website is attached hereto as **Exhibit C**.

1 14. Renaming the application would be devastating to customer loyalty. Customers
2 loyal to the brand WiCall would not find Tribair by searching the keyword WiCall. If WiCall
3 was renamed for even a short period of time, customer loyalty would be disrupted.

4 15. An injunction against using WiCall poses a grave danger to Tribair. Placement on
5 the search results of the iTunes App Store and Android Market is critical to an application's
6 success. Being at the top of the list when a user queries keywords like "VoIP" is an extremely
7 valuable commodity. The highest result has a much higher chance of being downloaded than a
8 result five, ten or fifty slots further down. No one really knows exactly what would happen to the
9 ordering of results if WiCall was renamed, because Apple and Google use a secret method to
10 order search results on their iTunes App Store and Android Market. A renamed product might be
11 dropped all the way down to the bottom of keyword search results, even if all of its other features
12 remain the same. Most users never scroll down very far on a results page, so any drop would
13 have a negative impact on WiCall's number of downloads and consequently, its revenue.

14 16. VoIP customers have many different options and would be unlikely to find a
15 renamed product even if they had very much liked the product under its original name. More
16 likely, they would select one of the more than 1000 applications that offer a service similar to
17 WiCall. Currently, WiCall enjoys a relatively high rank when customers type in relevant search
18 terms. For example, if a user searches for "VoIP Calls" in the iTunes App Store, WiCall
19 populates as the fifth result. A true and correct copy of the results of my user search is attached
20 hereto as **Exhibit D**. On the Android Market, WiCall populates as the second result. A true and
21 correct copy of my user search is attached hereto as **Exhibit E**. Returning to the WiCall name
22 after litigation concludes would not restore WiCall's strong position on the search results, and
23 WiCall would never fully recover regardless of the amount of time, effort and expense Tribair
24 invested.

25 17. In an effort to understand iCall's allegations that WiCall is diverting business from
26 iCall, I searched "iCall" in the google.com search engine. Even though I browsed through the
27 first ten pages of results, WiCall did not appear. A true and correct copy of the pages from my
28 search is attached hereto as **Exhibit F**. I also searched iCall in Google's Android Market and

1 iTunes. A true and correct copy of the results of these searches is attached hereto as **Exhibit G**.
 2 In each of these stores, iCall is the first application to appear, right next to its distinctive company
 3 logo. When WiCall does appear, it has its own logo and information including the application's
 4 author. There seems to be no plausible confusion that could arise between our VoIP product and
 5 iCall's.

6 18. There are other products and services similar to Plaintiff's iCall which incorporate
 7 the iCall name. Some of those on the Internet are iCallDialer (icalldialer.com), icallhere.com,
 8 icallglobal.com, iCall My World & iCall USA (Phone cards), iCall Centre (iopen.co.za), iCall
 9 Prepaid (www.stinternationalcards.com/spanish/Details.asp?Product=4096), iCall Manager
 10 (icallmanager.com), iCallFree (icallfree.com.ar), icall.ge, icallinsurance.com, iCall Solutions
 11 (icall.com.sg) and iCallServices.com. Applications on Apple's iTunes and Google's Android
 12 Market include iCallDialer, iCallDialerLite, I Call You, EasiCall, iCallShotgun, and Ashneh Icall.

13 19. I am personally familiar with WiCall's logos. The icon reproduced immediately
 14 below is WiCall's logo as viewed on Apple's iTunes App Store:

20 The icon reproduced below is WiCall's logo as viewed on Google's Android Market:

26 20. I am personally familiar with the logo for iCall. The icon reproduced below is
 27 iCall's logo as viewed on Apple's iTunes App Store and Google's Android Market:
 28

21. WiCall's logo on Google's Android Market incorporates the icon for the Wi-Fi Alliance. The trademarked logo for the Wi-Fi Alliance is reproduced below:

The foregoing is based on my personal knowledge. If called to testify as a witness, I could and would testify competently thereto.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct and that this declaration is executed on October 25, 2012 at Longueuil, Canada.

Description

Make & Receive free calls, free texts, phone calls and IM all for free w/ iCall!

Make free calls to real phones AND free calls to other iCall users! New York Times App of the Week, iCall has been downloaded more than 15,000,000 times! Make free calls, instant message, share photos, and chat with friends on Facebook chat, AIM, ICQ, Windows Live Messenger, XMPP and more!

Free, easy, instant registration required. More than 15,000,000 can't be wrong!

Plus you can send free text messages to other iCall users, receive free text messages from users of any other IM service. Free texts and free calls together make iCall a fantastic app. Start sending free texts and making and receiving free calls today!

iCall lets you make free phone calls using VoIP technology. VoIP saves you money by routing your phone call over the internet instead of the cellular network. The other person does NOT need to have iCall installed, you can make free phone calls using VoIP to regular phones!

PC Magazine says:

"iCall teaches Skype a lesson..."

The New York Times says:

"iCall was a breeze to use..."

Features:

- FREE phone calls - ad-supported USA & Canadian calling!
- Receive VoIP calls even when the app is not running
- Calls don't count towards your cell-calling plan
- Dirt-cheap international rates
- No roaming charges
- Compatible with the iPhone, iPod Touch, and iPad. Turn your iPod Touch into a real phone (microphone and headset required for iPod Touch second generation users)
- Instant message with users of iCall, Facebook, AIM, Windows Live Messenger, ICQ, Google Talk and any other XMPP enabled service.
- Share photos with anybody from right inside of iCall
- Use your iCall account anywhere
- Paid plans and premium features available for power users!

Compare iCall to other popular VoIP apps such as: Viber, Skype, Tango, Kakao, ooVoo and Text Plus! Hands down iCall is superior to all other VoIP, video, free call and free text services.

#1 best app

This the best voip app i have it on the computer and andriod and ipod i love this app i only use it for emergancy sometimes then again this tje best app i suggest people out there who want to make free good quailty calls please download icall you will love it

Vanessa - July 2, 2012 - LG Optimus One with version 0.9.34

Convenient

If calls lasted longer than four minutes and you could recieve calls it would be a five star app, other than that its

great :)

Ivan - September 3, 2012 - Samsung Admire with version 0.9.34

Bad limit!

This app would totally get 5 stars if it wasn't for the 5 minute talk limit that it has for every call! Thats super annoying!! -.-

Big money saver. Easy to use

Easy to use and safe to top up Via PayPal. Idiot proof all you need is a Wi-Fi connection. Saved a fortune ringing UK from USA. Easy to track credit as displayed in app. Not an app that I'll use everyday but will depend on when calling from or to a foreign land. Thanks developer. Forgot to mention you get free credit so you can give it a try before you buy, though only 15p or c it goes a long way when calls are so cheap. Install it just in case you need emergency credit or no mobile signal when abroad.
